Apps for My Business

Starwood TripLink Is Coming Soon

With the Starwood TripLink app, users can make reservations on Starwood sites and get their negotiated corporate discount for Starwood properties while booking on the Starwood website. After connecting their Concur account with their Starwood Preferred Guest (SPG) account, all users' Starwood booking data flows back into Concur, improving duty of care and policy compliance at a corporate level.

Starwood works with **Travel** for Concur Professional and **Travel** for Concur Standard. It will be available soon for TripLink customers in the Concur App Center under **Apps for Me** <https://www.concur.com/en-us/app-center>.

Travisa Is Coming Soon

By integrating Travisa and Concur company-level accounts, your employees will be able to have their Travisa receipts automatically sent to their Concur accounts for easy and accurate expense reporting.

Once your company is set up, your employees will be able to connect to Travisa to start receiving E-receipts. Once they do so, Travisa will automatically send any receipt for an order they've placed to their Concur account.

You must have the Web Services Administrator role in order to provide company-level access to Travisa e-receipts. If you're unsure whether you have this role, please contact your Concur representative.

Travisa will be available soon in the Concur App Center under **Apps for My Business** at <https://www.concur.com/en-us/app-center>.

Addison Lee Is Coming Soon

Addison Lee is the UK's largest chauffeur and premium minicab service and will soon be available globally. In the UK, it provides an average response of less than 10 minutes. A licensed, branded high quality fleet of 3,800 air-conditioned 7-seater MPVs, 400 hybrid saloons and 400 Mercedes saloons is why over 10 million Londoners use Addison Lee every year.

With Concur Addison Lee makes ground transport effortless and connected. Airport transfer and taxi bookings can be made inside Concur Travel.

All bookings are safe and easily tracked. Users receive an SMS message to let them know their car is on its way, and another one when the car has arrived. Users can find their vehicles with GPS. For airport transfers, a driver meets users at the airport or a location of their choice.

All journeys are simply priced from point to point with no meters and no surprises (taxes and tolls are included and users do not need to provide a gratuity). Behind the scenes, Addison Lee places all e-receipts in the users' Concur expenses, making the whole process paperless, transparent, and connected.

Addison Lee will be available soon in the Concur App Center under **Apps for My Business** at <https://www.concur.com/en-us/app-center>.

Apps for Me

EmailXpenC Is Now Available

With EmailXpenC by GlobeXpenC, users on the go with limited Internet access can create and manage expense reports in Concur using email or Excel.

Users simply complete expense reports by typing expense information directly into an e-mail or submitting an Excel workbook to Concur along with attached receipts. EmailXpenC captures and itemizes expense details in the users' Concur expense reports. It also collects receipt information directly from the e-mail messages, enabling a seamless reimbursement process.

EmailXpenC is available in the Concur App Center under **Apps for Me** at <https://www.concur.com/en-us/app-center>.
