Expense Report: PUT Method is Now Implemented

Overview

In this release, the Entries version 3.0 resource has been enhanced to support the PUT HTTP method. It now supports GET, POST, PUT, and DELETE.

Business Purpose

To create expense entries in a Concur expense report such as a one-rate, personal car mileage expense entry.

URI

`https://{ConcurHost}/api/v3.0/expense/entries`

Configuration

Entries version 3.0 can be used in the Concur Platform Developer Sandbox and it works with the following Concur products:

- ◆ **Expense** for Concur Professional
- ◆ **Expense** for Concur Standard
- ◆ **Expense** for Concur Mobile

A partner application must be created and registered with Concur before developers can use this feature.

For more information, refer to the Entries documentation at <https://www.concursolutions.com/api/docs/index.html#!/Entries>.
